

Constant climate chamber HPP400

Our constant climate chamber is tailored to environmental simulation, material testing and stability testing in accordance with the ICH guidelines.

On this page, you can find all the essential technical data on the Memmert stability chamber HPP. Our customer relations team will be pleased to help if you want further information. If you should require a customised special solution, please contact our technical specialists at myAtmoSAFE@memmert.com.

Temperature

Temperature	2 Pt100 sensors Class A in 4-wire-circuit, mutually monitoring and taking over the performance at the same temperature value	
Setting accuracy temperature	0.1°C	
Working temperature range	with light: from +15°C to +40°C	
Working temperature range	without light: from 0°C to +70°C	

Humidity

Setting range humidity	10 - 90 % rh	
Setting accuracy humidity	0.5 %	
Humidity	humidity supply with distilled water from external tank by self-priming pump	
Humidification	humidification by hot steam generator	
Dehumidification	dehumidification by cold trap using the Peltier technology	

Control technology

ControlCOCKPIT	TwinDISPLAY. Adaptive multifunctional digital PID-microprocessor controller with 2 high-defir TFT-colour displays.	
Language setting	German, English, Spanish, French, Polish, Czech, Hungarian	
adjustable parameters	temperature (Celsius or Fahrenheit), relative humidity, programme time, time zones, summertime/wintertime	
Timer	Digital backwards counter with target time setting, adjustable from 1 minute to 99 days	
Function HeatBALANCE	adapting the distribution of the heating performance of the upper and lower heating circuit from -50 $\%$ to +50 $\%$	
Function SetpointWAIT	the process time does not start until the set temperature is reached	
Calibration	three freely selectable temperature values, 2-point calibration for humidity: 20 and 90 % rh	

Communication

Interface	Ethernet LAN, USB	
Documentation	programme stored in case of power failure	
Programming	AtmoCONTROL software on a USB stick for programming, managing and transferring programmes via Ethernet interface or USB port	

Safety

Temperature control	over- and undertemperature monitor TWW, protection class 3.3 or adjustable temperature limiter TWB, protection class 2, selectable on display	
AutoSAFETY	additionally integrated over- and undertemperature protection "ASF", automatically following the setpoint value at a preset tolerance range, alarm in case of over- or undertemperature, heating function is switched off in case of overtemperature, cooling function in case of undertemperature	
Autodiagnostic system	integral fault diagnostics for temperature and humidity control	
Alarm	visual and acoustic	

Heating concept

Peltier	energy-saving Peltier heating-/cooling system integrated in the rear (heat nump principle)

Standard equipment

Standard accessories	Water tank including connection hose	
Works calibration certificate standard values +10 °C, +37 °C and at +30 °C and 60% rh		
Internals	2 stainless steel grids	

Stainless steel interior

Volume	384	
Dimensions W x H x D in mm	w _(A) x h _(B) x d _(C) : 640 x 1200 x 500 mm	
Max. number of internals	14	
Max. loading of chamber	200 kg	
Max. loading per internal	30 kg	

Textured stainless steel casing

Installation	on lockable castors	
Dimensions	w _(D) x h _(E) x d _(F) : 824 x 1720 x 788 mm	
Housing	rear zinc-plated steel	

Electrical data

Voltage Electrical load	230 V, 50/60 Hz approx. 1200 W	
Voltage Electrical load	115 V, 50/60 Hz approx. 1200 W	

Packing/shipping data

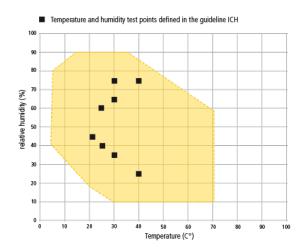

the appliances must be transported upright

Customs tariff number	8419 8998
Country of origin	Federal Republic of Germany
WEEE-RegNo.	DE 66812464
Dimensions approx incl. carton	B x H x T: 93 x 1930 x 930 mm
Net weight	approx. 130 kg
Gross weight carton	approx. 213 kg

Temperature-humidity working range HPP

Not all climate chambers are the same. The humidity content of the chamber load, the ambient conditions and the respective temperature-humidity working range are decisive factors in the selection of the right appliance. In the adjacent diagram, you can see the possible temperature/humidity combinations for our constant climate chamber HPP.

Within the respective temperature-humidity range, condensation-free permanent operation is possible. To which extent condensation may occur in the threshold range depends on the humidity content of the chamber load and the ambient conditions.

Temperature-humidity working range HPP

Standard units are safety-approved and bear the test marks
